

1. Формирование OLAP отчета в API

Получить данные в API при помощи OLAP отчета можно следующими путями:

- получение данных по преднастроенному отчету в iikoOffice: в классическом приложении iikoOffice выбрать в навигационном меню раздела «Розничные продажи» - "OLAP Отчет по продажам", добавить в него поля и период для получения данных, сохранить данный вариант. Далее выгрузить список преднастроенных отчетов и получить информацию по полям и фильтрам при помощи метода «Получение отчета по сохраненной конфигурации».
- самостоятельное формирование отчета OLAP, руководствуясь документацией.

В обоих случаях рекомендуется использовать OLAP v2.

Тот же механизм доступен для работы с "OLAP Отчет по проводкам" в разделе "Финансы".

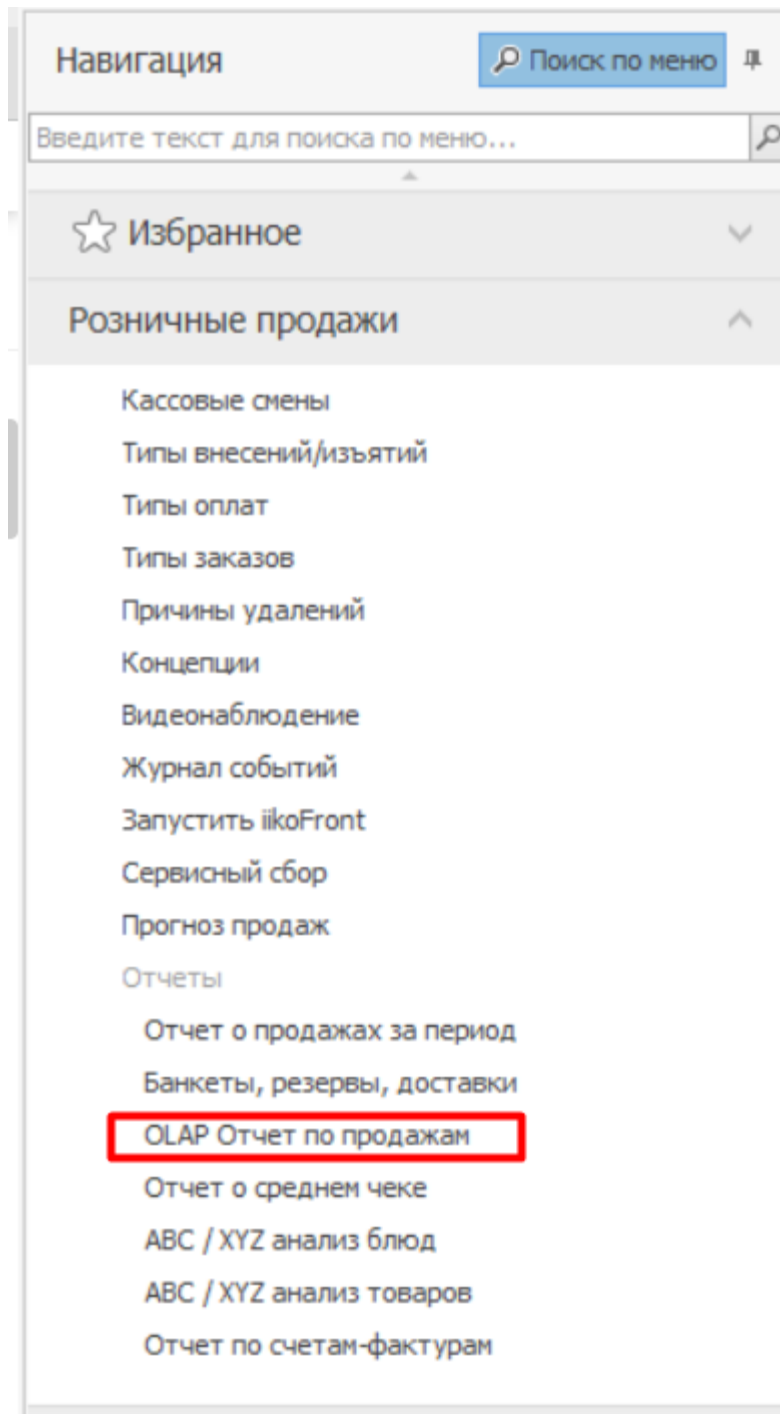

Описание примеров OLAP-отчетов в iikoOffice можно найти в [здесь](#).

Описание примеров OLAP-отчетов в API можно найти [здесь](#).

Подробное описание полей можно прочитать в [статье по полям OLAP-отчета по продажам](#) и в [статье по полям OLAP-отчета по проводкам](#).

Процесс формирования отчета в iikoOffice

В классическом приложении iikoOffice выберите "OLAP Отчет по продажам" в навигационном меню раздела «Розничные продажи»:

После запуска «OLAP Отчет по продажам» укажите период сбора данных, добавьте поля для сбора данных.
